

Telecom Service of Atlanta Announces the Launch of its New and Improved Website

Atlanta, GA May 31, 2011 Telecom Service of Atlanta spokesperson, Keith Henderson announced today that the 30 year old telephony technology equipment and services provider has launched its next generation website and it is now accessible to all at <http://www.tsaatlanta.com>. Mr. Henderson said that TSA has made every effort to, "make our web presence reflective of the new technologies available in our partner's offerings as well as the many solution areas TSA offers its clients."

"As the company has grown, we have seen the need to provide more Hosted Solutions to our new and existing client base. Hosted PBX, hosted conferencing, SIP trunking, colocation hosting, remote asset monitoring and management are all new services TSA has added to our portfolio. We needed to add these services to our web presence and let the world know what we offer." Mr. Henderson went on to say that these new product types, "are harmonious with our traditional On-Premise offerings from Switchvox/Digium, Adtran IP Gateways and Polycom Desktop phones.

TSA is also utilizing its new webpage to highlight its expertise in Voice and Data Cabling as well as its standing as a Certified Microsoft Small Business Specialist and as a Silver Midmarket Solution Provider. Keith said, "we are very proud of these as it separates us from our competition."

Senior sales engineer Andrew Carrega and TSA Account Executive Louis Lewow have been instrumental in the design and content development for the new TSA site. "We are still trying to make it more interactive for the user. Very shortly, we will add interactive online calculators that will enable visitors to create order of magnitude pricing on a new phone system or create an ROI migration model from ISDN PRIs to cost-effective SIP IP Trunking. We are also planning to reach out to the business community and spread our brand through all of the major social networking platforms" added Mr. Lewow.

"Please stay tuned. In the coming weeks and months, you'll be hearing a lot more about us" said Mr. Henderson.

About Telecom Service of Atlanta: For over 30 years, TSA and its operating divisions, have installed, maintained and serviced business communications systems throughout the Southeastern U.S. We partner with businesses to help solve the technology challenges they face today. Our mission is to provide BUSINESS solutions through the effective implementation of TECHNOLOGY based communications systems. As a result, you get more than the solution; you receive the experienced service and support that builds lasting customer relationships. TSA proudly represent such highly regarded telephony brands as: Digium, CRI, Polycom, Adtran, Vartel, Wilson Electronics and is a Certified Microsoft Partner.
